

ALLAHA RAKHA

Flutter Developer

Bahawalpur, Punjab, Pakistan | +92-308-1137368

PROFESSIONAL SUMMARY

Results-driven Flutter Developer with 3+ years of professional experience designing and delivering high-performance, cross-platform mobile applications for Android and iOS. Proficient in Dart, Flutter framework, BLoC, GetX, and Provider state management, REST API integration, Firebase (Authentication, Firestore, Push Notifications), and Git-based version control. Proven ability to build scalable, maintainable code from UI implementation through to production deployment on Google Play Store. Strong collaborator with cross-functional teams including designers, backend engineers, and product managers.

TECHNICAL SKILLS

Programming Languages: Dart, basic knowledge of JavaScript

Mobile Development: Flutter (cross-platform iOS & Android), Responsive UI Design, Material Design, Custom Widgets

State Management: BLoC (Business Logic Component), GetX, Provider

Backend & APIs: REST API Integration, JSON Parsing, HTTP/Dio packages, Firebase Authentication, Cloud Firestore, Firebase Push Notifications

Tools & Workflow: Git, GitHub, Android Studio, VS Code, Postman, Google Play Console, Agile/Scrum

Other Skills: Debugging, Performance Optimization, Code Review, App Deployment, UI/UX Implementation

WORK EXPERIENCE

Flutter Developer

November 2024 – April 2026

SynticAI | Bahawalpur, Pakistan

- Developed and maintained high-performance cross-platform mobile applications using Flutter and Dart for Android and iOS platforms.
- Designed and implemented scalable, reusable widget components following Material Design guidelines and responsive UI best practices.
- Integrated RESTful APIs using Dio and HTTP packages, handling JSON parsing, authentication tokens, and error states.
- Implemented BLoC and GetX state management patterns to ensure clean architecture and separation of business logic.
- Integrated Firebase services including Authentication, Cloud Firestore, and Push Notifications for real-time app functionality.
- Optimized app performance by reducing build times, identifying memory leaks, and improving widget rendering efficiency.
- Collaborated with UI/UX designers and backend engineers in an Agile environment to deliver features on schedule.

Junior Flutter Developer

February 2024 – October 2024

Createex | Lahore, Pakistan

- Contributed to the development of cross-platform mobile applications using Flutter for clients across multiple industries.

- Built responsive UI components and screens from Figma designs, ensuring pixel-accurate implementation on both Android and iOS.
- Integrated REST APIs, handled JSON serialization/deserialization, and managed API error handling and loading states.
- Fixed software bugs, improved code quality, and conducted code reviews with senior developers to uphold best practices.
- Collaborated with senior developers and product teams to implement user-facing features within sprint deadlines.

Flutter Developer

August 2023 – January 2024

TechSwivel | Lahore, Pakistan

- Gained practical, hands-on experience in cross-platform mobile application development using Flutter and Dart.
- Assisted in building user interface screens, integrating third-party APIs, and implementing core application features.
- Participated in debugging sessions, code quality improvements, and technical discussions with senior developers.
- Followed Agile development processes, attended daily standups, and contributed to sprint planning and retrospectives.

Flutter Developer Intern

February 2023 – July 2023

Enigmatix | Bahawalpur, Pakistan

- Developed foundational skills in Flutter and Dart by contributing to real-world cross-platform mobile application projects.
- Assisted in building and testing UI screens, integrating APIs, and implementing app features under senior developer supervision.
- Participated in code reviews, debugging sessions, and team meetings to learn industry-standard development workflows.
- Gained hands-on exposure to Git version control, Agile methodology, and mobile app deployment processes.

PROJECTS

Smart Cash – Personal Expense Tracker App

November 2025 – January 2026

Technologies: Flutter, Dart, Firebase Firestore, Provider, Google Play Store

- Designed and developed a fully functional personal finance mobile app to help users track and manage daily expenses.
- Implemented real-time data updates via Firebase Firestore, budget monitoring alerts, and spending analytics dashboard.
- Delivered a clean, intuitive UI with category-based expense grouping and visual spending summaries.
- Successfully deployed and published to Google Play Store, managing the full end-to-end release process.

AO Scan – Document Scanner App

Technologies: Flutter, Dart, Image Processing, Secure Storage, Google Play Store

- Built a high-performance document scanning application with real-time camera scanning and image processing capabilities.
- Implemented secure local storage for scanned documents with an intuitive file organization and management interface.
- Focused on app performance, smooth scanning experience, and cross-device compatibility across Android versions.
- Successfully deployed to Google Play Store with positive user adoption and production-ready stability.

EDUCATION

Bachelor of Science in Computer Science

February 2019 – January 2023

The Islamia University of Bahawalpur | Bahawalpur, Pakistan

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Software Engineering, Mobile Application Development, Computer Networks
